- A process of finding the correct strategy to respond to a problem.
- Problem solving involves analytical and creative skills.
- Some businesses uses the PDCA process/cycle to solve a problem.
- PDCA stand for Plan-Do-Check-Act.

## **7 The Delphi technique and Force-Field analysis**

### **7.1 Meaning of the Delphi Technique**

- It is a technique that is used to solve new and complex problems.
- The Delphi technique is a popular method of gathering information by using a selected expert's panel on a specific topic.
- The group of specialists/expert's panel never meet face to face.
- This technique uses a series of questionnaire to obtain feedback from experts.
- The questionnaires are used to bring about agreement from different views.

### **7.2 Ways in which businesses can apply the Delphi Technique in the workplace**

- Businesses must invite a panel of experts to research the complaints from customers.
- Experts do not have to be in one place and will be contacted individually.
- Design a questionnaire consisting of questions on how to improve the quality of their tiles and distribute it to the panel members/experts.
- Request the panel to individually respond to the questionnaire/suggest improvements to the products and return it to businesses.
- Summarise the responses from the experts in a feedback report.
- Send the feedback report and a second set of questions/questionnaire based on the feedback report to the panel members.
- Request panel members to provide further input/ideas on how to improve the quality of their tiles after they have studied the results/documentation.
- Distribute a third questionnaire based on previous feedback from the second round.
- Prepare a final summary/feedback report with all the methods to improve the quality of products.
- Choose the best solution/proposal after reaching consensus.

### **7.3 Meaning of force field analysis**

- Force field analysis is a method of listing, discussing and analysing the various forces for/advantages and against/disadvantages of a proposed change.
- It is often used for planning and implementing change in a business.
- The analysis involves identifying the advantages and disadvantages of a decision.
- This tool is especially useful to overcome resistance to change.

### **7.4 Ways in which businesses can apply the force field analysis**

- Describe the current situation/problem and the desired situation.
- Identify what is going to happen if there is no action taken.
- List all driving/pros and restraining/cons forces that will support and resist change.
- Discuss the key restraining forces and determine their strengths.
- Discuss the key driving forces and determine their strengths.
- Allocate a score to each force using a numerical scale, where 1 is weak and 5 is strong.
- Weigh up the positives and negatives then decide if the project is viable.
- Analyse the restraining forces and best way of advancing them.

- Explore the driving forces and the best way of advancing them
- Choose the force with the highest score as the solution.
- If the project is viable, find ways to increase the forces for change.
- Identify priorities and develop an action plan.

## **8 Advantages of working with others to solve problems**

- The problem can be solved faster and easier.
- Workload decreases if everyone does their share.
- More ideas can be generated increasing the chances of finding the best possible solutions.
- Exposure to other people's thinking patterns and to the way other people approach problems.
- Enables team members to learn from others and accept their points of views.
- Greater results can be achieved.
- Team members have access to a broader bases of knowledge, skills and expertise.
- The problem is viewed from different perspectives.
- There is access to a broad base of knowledge, skills and expertise.
- Problems are analysed in greater detail which lead to better understanding of the problem.
- Promotes creative thinking and idea generation by thinking of as many ideas as possible to solve problems.
